In the Claims:

1. (Currently Amended) Headset A headset system, comprising:

a headset for direct wireless communication of audio data with a communication terminal, said headset and including a first power supply unit, the system further comprising;

a headset carrying device; and

a charger for charging said the first power supply unit from a second power supply unit, eharacterised in that said wherein the headset carrying device comprises said the charger and said the second power supply unit, and which wherein the headset carrying device is separate from said the communication terminal.

- 2. (Currently Amended) The headset system as recited in claim 1, eharacterised in that said wherein the headset carrying device comprises a protective casing for athe headset stowed therein.
- 3. (Currently Amended) The headset system as recited in claim 1, characterised in that said wherein the headset carrying device comprises attaching means for attaching to a user's body or clothes.
- 4. (Currently Amended) The headset system as recited in claim 1, characterised in that said wherein the headset carrying device comprises attaching means for mechanically attaching the headset carrying device to a vehicle, and for electrically attaching the charger of the headset carrying device to a power supply of said the vehicle.
- 5. (Currently Amended) The headset system as recited in claim 1, eharacterised in that saidwherein the first power supply unit is a re-chargeable battery.
- 6. (Currently Amended) The headset system as recited in claim 1, characterised in that saidwherein the first power supply unit is a large-capacity capacitor.

- 7. (Currently Amended) The headset system as recited in claim 1, characterised in that said wherein the charger is a re-chargeable battery.
- 8. (Currently Amended) The headset system as recited in claim 1, characterised in that saidwherein the charger is a large-capacity capacitor.
- 9. (Currently Amended) The headset system as recited in claim 7-or 8, eharacterised in that saidwherein the charger is connectable to a vehicle battery for recharging of the charger.
- 10. (Currently Amended) The headset system as recited in claim 1, eharacterised in that saidwherein the charger is a primary cell battery.
- 11. (Currently Amended) The headset system as recited in claim 1, characterised in that said wherein the first power supply unit is diminished to last provide power for a short period of use of communicating audio data, converting between audio data and audio signals, and conveying audio signals, before re-charging is necessary.
- 12. (Currently Amended) The headset system as recited in claim 11, characterised in that saidwherein the short period is in the range of <u>about</u> zero to two hours.
- 13. (Currently Amended) The headset system as recited in claim 11, characterised in that saidwherein the short period is in the range of about thirty minutes to one hour.
- 14. (Currently Amended) Headset A headset carrying device for carrying a headset when the headset is not in use, the device comprising:

an electrical charger and means for establishing electrical contact between the charger and a first power supply unit of a headset carried by the headset carrying device, for chargingthe electrical charger being configured to charge the first power supply unit from a second power supply unit, characterised in that saidwherein the headset carrying device

includes saidthe second power supply unit and is separate from a communication terminal to which the headset is communicatively connectable.

- 15. (Currently Amended) The headset carrying device as recited in claim 14, eharacterised in that it comprises further comprising a protective casing for a headset stowed therein.
- 16. (Currently Amended) The headset carrying device as recited in claim 14, eharacterised in that it comprises further comprising a casing for stowing a headset, which wherein the casing is transformable into a desktop mode for placing configured to position the device on a horizontal surface.
- 17. (Currently Amended) The headset carrying device as recited in claim 14, eharacterised in that it comprises-further comprising attaching means for attaching the headset carrying device to a user's body or clothes.
- 18. (Currently Amended) The headset carrying device as recited in claim 14, eharacterised in that it comprises further comprising attaching means for mechanically attaching the headset carrying device to a vehicle, and for electrically attaching the charger of the headset carrying device to a power supply of said vehicle.
- 19. (Currently Amended) The headset carrying device as recited in claim 14, eharacterised in that it comprises further comprising headset securing means for mechanically retaining a headset stored therein.
- 20. (Currently Amended) The headset carrying device as recited in claim 19, eharacterised in that said wherein the headset securing means is devised configured to maintain electrical contact between co-operating contacting means for said the charger and said the power supply unit.
